**Issue Reported:** Administrative reviewers (Chairs/Deans) may see the error message “Windows cannot complete the extraction. The destination path is too long. Rename the Compressed (zipped) Folder and try again.” **OR** Error 0x80010135: Path too Long when selecting “Download submission with files to my computer”

The issue is with Windows native zip software. It occurs by file names that are very long or file names with unexpected characters (file names are auto-generated by the system).

You can use third-party solutions which will help you to open the zip file.

Here is a link to the site to download the third-party software <https://www.7-zip.org/> attached is a screen capture of what needs downloaded from the site.
