

Bloodborne Pathogens Exposure Control Plan Information and Training Certification

The Occupational Safety and Health Administration (OSHA) Bloodborne Pathogens Standard (29 CFR 1910.1030) requires all employees with occupational exposure to bloodborne pathogens to participate in an annual training program. By signing below you acknowledge that you have received the OSHA training and information as well as policies and procedures applicable to your work. This training contained at least the following elements:

1. An accessible copy of the regulatory text of the OSHA Bloodborne Pathogen Standard (29 CFR 1910.1030) and an explanation of its contents
2. A general explanation of how widespread bloodborne diseases are among the general population and what the symptoms of bloodborne diseases are
3. An explanation of the ways bloodborne diseases are transmitted
4. An explanation of the Purdue University Exposure Control Plan and how you can obtain a copy
5. An explanation of the appropriate methods for recognizing tasks and other activities that may involve exposure to blood and other potentially infectious materials
6. An explanation of the use and limitations of methods that will prevent or reduce exposure including appropriate engineering controls, work practices, and personal protective equipment
7. Information on the types, proper use, location, removal, handling, decontamination and disposal of personal protective equipment
8. An explanation of how personal protective equipment is selected for particular jobs
9. Information on the hepatitis B vaccine, including how well it works, safety, method of administration, the benefits of being vaccinated, and that the vaccine and vaccination will be offered free of charge
10. Information on the appropriate actions to take and persons to contact in an emergency involving blood or other potentially infectious materials
11. An explanation of the procedure to follow if an exposure incident occurs, including the method of reporting the incident and the medical follow-up that will be made available
12. Information on the post-exposure evaluation and follow-up that Purdue University is required to provide for the employee following an exposure incident
13. An explanation of the signs and labels and/or color coding required by the Exposure Control Plan
14. An opportunity for interactive questions and answers with the person conducting the training session
