

Lockout/Tagout Program Training Certification

In compliance with OSHA 29 CFR 1910.147 regulations, the Lockout/Tagout training addresses the practices and procedures necessary to disable machinery or equipment, thereby preventing the release of hazardous energy while employees perform servicing and maintenance activities. Topics covered include:

- What is Lockout/Tagout
- Why is hazardous energy a problem
- How Lockout/Tagout can protect workers
- What procedures are involved with Lockout/Tagout

After reviewing the training PowerPoint provided by PFW EHS on Lockout/Tagout Safety, please complete and return a copy of this form to your supervisor or Designated Trained Individual (DTI).

By signing below you acknowledge that you are aware of the practices and procedures necessary to disable machinery or equipment, thereby preventing the release of hazardous energy while employees perform servicing and maintenance activities, as well as policies and procedures applicable to the OSHA 29 CFR 1910.147 regulation. Your supervisor or DTI will provide additional information and training as appropriate.
