

Scaffolding Standard Operating Procedure Training Certification

By signing below you acknowledge that you have received training and information concerning the OSHA Safety Requirements for Scaffolding Standard Operating Procedure and the policies and procedures applicable to your work when scaffolding structures are being utilized. This training program contained at a minimum the following elements:

- General description of scaffolding structures and how they are used
- Different types of scaffolding structures and hazards associated with them
- Knowledge of how to assemble and disassemble scaffolding
- What types of surfaces are appropriate for scaffolds to be built on
- Maximum weight limits each type of scaffolding structure is rated for
- Requirements for platforms used as worker platforms
- Fall protection requirements, including the use of guardrails and personal fall-arrest systems
- Roles and responsibilities of competent person(s) assigned to each scaffolding project
