

Deidra Roth and Alyssa Sherman.

Recent Grad Found Balance, Calling at PFW

In many ways, Deidra Roth, B.S. '23, is not an exceptional Purdue University Fort Wayne success story, but she is an important one. She didn't overcome a tragedy or huge physical limitation to succeed; instead, she's going to help others overcome their challenges.

Roth's goal in life is to become an audiologist who can help others. After graduating this spring with a **communication sciences and disorders degree**, she is heading to West Lafayette for a four-year clinical doctorate program in audiology.

Roth credits her experience with TRIO Student Support Services for helping her and other first-generation students adjust to college.
