Early Registration for Spring and Summer Terms Begins Next Week

Hi there, Mastodons,

It may sound crazy, but early registration for the spring semester begins next week—and we want you back here in January for an awesome new term!

Here's the early registration start calendar, which is based upon credit hour completion and class standing:

Oct. 28 | Degree candidates, graduate students, and seniors

Nov. 4 | Juniors, Honors Program students, student-athletes, and students with disabilities

Nov. 11 | Sophomores

Nov. 18 | Freshmen and others

It's very beneficial to get registered during the week registration opens for you so you can get the classes you need to continue your degree and choose course times that fit best with the rest of your work, cocurricular, and personal responsibilities.

Here are some important steps to take to prepare for successful spring registration:

- Before your week begins, check your **goPFW** account to make sure you do not have any holds preventing you from registering. If you do, work to satisfy those ASAP so you do not get behind.
- As needed, meet with your academic advisor to select courses that fit with your degree plan. You can find your advisor's information in **goPFW** as well.
- When your week opens, you can register for both spring 2025 and summer 2025 class terms.

If you are stuck and don't know where else to turn, email success@pfw.edu and one of the advisors will be happy to assist.

But before we drift too far into the future, there are still so many cool events happening this semester. Be sure to check them out and consider participating.

Are you a first-generation student like me, meaning you are the first in your family to attend college? If so, please join members of our first-generation staff/faculty for the National First-Generation Day Celebration on Nov. 6 from 11 a.m. to 1 p.m. in the Classic Ballroom at Walb Student Union.

Hope to see you there!

Positive Practices

Prioritize sleep. Getting 7 to 9 hours of sleep each night is one of the most important things you can do to protect your mental health and boost academic performance. It can be tempting to cut back on sleep during your college years, but lack of sleep can lead to increased anxiety, irritability, trouble focusing, and even depression.
