

## QUESTION TIME

Would the administration please speak to the issue of School and Department S&E? As the number of faculty (full and part-time), students and student credit hours grow; the expectations of academic contribution, teaching scholarship and community engagement by faculty increases; and travel, supplies and electronic support costs for these efforts increase; the S&E budgets remain stagnant to a 1 or 2 percent increase per year. How is the university planning to fill this funding/expectation gap?
