# A MESSAGE FROM THE DIRECTOR

Our MMT program is far more than a list of courses you check off to receive a degree. Here, you will actively engage in learning experiences that will broaden your understanding of the affordances music offers as a transformative force in people's health and well-being. You will take a deep dive into theory and research and apply it to clinical practice. Self-reflection and personal development will lead to your increased awareness and growth as a professional. You will develop relationships with others in your cohort who will become a strong and enduring support system for the rest of your career. Most importantly, your clients will benefit from the enhanced effectiveness of your nuanced clinical skills that are culturally sensitive and individualized for their specific needs, while you will feel more satisfied and fulfilled with your chosen profession.

If you are ready to re-invigorate your career, contact us now. We look forward to joining you on your journey!
